Art Unit: 3617

DETAILED ACTION

Page 2

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the lock plate having an upper and lower end, each provided with a protrusion with a hole as claimed must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Application/Control Number: 10/811,862 Page 3

Art Unit: 3617

3. Claims 8 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The now claimed embodiment of claim 8, setting forth a lock plate having an upper and lower end, each provided with a protrusion with a hole finds no support in the application as originally filed.

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is not understood. Specifically the relationship between the first and second transponder, with that originally set forth is unclear.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Takashima.
 Takashima discloses the claimed invention.

Application/Control Number: 10/811,862

Art Unit: 3617

Re "provided separately", such fails to define any specific structure and/or arrangement so as to define over Takashima, as the transponder **58** is inherently constructed separately from the lock plate, and later joined thereto, and therefore such transponder has been "provided separately" as claimed.

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 2-4,6,7,9,10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takashima in view of Watanuki.

Takashima fails to disclose the detachment of the transponder from the plate.

Watanuki shows a lock plate (key) with an embedded transponder. An access door **9** is provided, rendering the transponder removable from the plate.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide for the removability of the transponder of Takashima as taught by Watanuki.

Such a combination would have been desirable at the time the invention was made so as to provide for ease in assembly and/or repair.

Re claim 6, "beginner" and "experienced" fails to define any specific structure and/or arrangement so as to define over the engine not running and running states.

Re claims 3 and 7, such fails to define any specific structure and/or arrangement so as to define over provision of the hole for insertion of the transponder and door on the side of the plate.

Re claim 9, such fails to define any specific structure and/or arrangement so as to define over any element.

10. Applicant's arguments filed 4/20/2005 have been fully considered but they are not persuasive.

Applicant argues that Takashima fails to provide the transponder separately, and that claim 1 requires the transponder to be provided separately in its "present assembled state".

Contrary to Applicant's arguments, claim 1 does NOT require such a separation of transponder and lock plate. The rejection is deemed proper and stands.

Applicant argues that the examiner has ignored the "change in performance" limitation of claim 2 in application of Watanuki.

The examiner has not. The "performance" limitation fails to define any specific structure and/or arrangement so as to define over the difference in a running and non-running condition of the engine, which clearly qualifies as a change in engine performance.

Applicant argues that the combination of Takashima and Watanuki is improper, as the teaching of sealing the transponder so as to protect same from the elements has been destroyed.

Art Unit: 3617

The examiner does not agree that Watanuki teaches an unsealed transponder compartment. To the contrary, the tightly attachment of the door **9** is discussed. Furthermore, one of ordinary skill in the art would have adhered to the teachings of the primary reference, and provided for a seal between door and housing. Such being well within the level of skill of the ordinary routineer, providing no unexpected results.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 571-272-6688. The examiner can normally be reached on Monday through Thursday 6:30 am to 2:00 pm..

Application/Control Number: 10/811,862
